

Pragnesh Bagary

Backend Engineer | Go · Python · Java

📞 7680039378 ✉ pragneshbagary1699@gmail.com 📍 Hyderabad, India
🌐 LinkedIn 🐙 Github

TECHNICAL SKILLS

Languages: Go, Python, Java, SQL

Backend: REST APIs, JWT & session auth, RBAC, concurrency, PostgreSQL, SQLite, Gin / Echo / Fiber

Infrastructure: AWS, Google Cloud, Docker, Git, CI

AI Tooling: FastAPI, Pinecone, vector databases, LLM APIs, RAG pipelines

PROJECTS

go-thin, composable Go framework | *Go, PostgreSQL, SQLite, Gin/Echo/Fiber* 2025 – present

- Building **go-thin**, a set of small, **interface-driven** Go libraries — **go-auth**, **go-paginate**, **go-events** — that compose through interfaces and never depend on each other (e.g. go-auth publishes to go-events without either knowing the other exists).
- go-auth**: full JWT access/refresh lifecycle (rotation, revocation/blacklisting), **Argon2id** hashing, RBAC, and session management — with **3** framework adapters (Gin, Echo, Fiber) and **3** storage backends (PostgreSQL, SQLite, in-memory) plus migration tooling.
- Test-first design — statement coverage of **100%** (go-paginate), **96%** (go-events), and **~74%** on go-auth's core auth/JWT logic.

Vista, personal RAG chatbot | *Python, FastAPI, Pinecone* 2025

- Built a **FastAPI** RAG backend that answers questions about my background — document ingestion, chunking, embeddings, vector retrieval, and response orchestration over **721 records** indexed in **Pinecone** with namespace isolation and metadata-driven source attribution.
- Added **intent-aware query routing** (direct vs. retrieval-augmented) with context-size controls to keep responses grounded and token-efficient.

OPEN SOURCE CONTRIBUTIONS

charmbracelet/crush, *Go · 25.4k* ★ 2026

- Diagnosed and fixed a **goroutine race condition** where prompt-history loading raced the agent's message write, dropping cancelled prompts from arrow-up history; fix submitted (PR #2773, open).

lima-vm/lima, *Go · 20.9k* ★ 2025

- Fixed **glob** no-match errors (normalized nil SFTP results to an empty slice) and **write_file** failures (recursive parent-dir creation via **MkdirAll**); un-skipped integration tests for both. *Merged*.

EXPERIENCE

Associate Software Developer Sep 2021 – Apr 2022

Accenture

Hyderabad, India

- Provided L1 production support for **Diebold Nixdorf** environments across **50+ servers** — monitoring health, patching, and triaging downtime incidents to maintain service availability.
- Managed and escalated production-support tickets, coordinating with senior engineers on incident resolution.

COMPETITION

March Machine Learning Mania, Kaggle 2026

- Ranked **top 50 of 3,462 teams (top 1.4%)** across 12,252 entrants.

EDUCATION

San José State University

M.S. Computer Engineering, 30/36 credits

Aug 2022 – May 2024

San José, USA

Chaitanya Bharathi Institute of Technology

B.E. Computer Science and Engineering

Aug 2017 – Jun 2021

Hyderabad, India
